Follow up FYI. Bo talked with Rose on Friday – his summary below.

It actually was a really good talk. The states (or maybe just Rose...not sure) were under the impression that we were putting out for comment the guidance document, which had the potential to affect all aspects of all 24(c) registrations. I explained that we are focusing only on the ones that are more restrictive than the section 3. I also reminded her that they would have an opportunity to comment. She seemed fine at the end of the conversation.

Rose—

Thanks for your note. I'd encourage you to reach out to Mike Goodis and Bo Davis. They would be in a better position to know about the progress of this effort.

I hope all is well.

Hi Rick,

I hope that all is going relatively well.

As you may recall for the March 2019 AAPCO Conference, AAPCO wanted EPA to provide an update on the progress associated with EPA's review of the Draft FIFRA Section 24(c) Guidance Document. But because of the shut-down, there was a delay in the review.

Will EPA be prepared to provide an update in March 2020? If so, will this be an extensive update (requiring a separate time slot) or will you perhaps include it in your presentation?

I do not want EPA to feel rushed into making premature decisions, we can wait until the March 2021 Conference.
